J-TREC

J-TREC to Exhibit at InnoTrans 2018

Japan Transport Engineering Company (J-TREC) participates in InnoTrans 2018, which will be held from September 18 to 21, 2018 in Berlin, Germany. InnoTrans is the leading international trade fair for transport technology and takes places every two years in Berlin.

We manufactured “sustina” which is the next-generation stainless steel cars in 2013 and have been developing “sustina” series steadily since then. In this exhibition, we introduce our technology and products with AR (Augmented Reality).

The outline of the exhibition is as shown below. We look forward to your visit.

■ InnoTrans 2018

Date: September 18 to 21, 2018

Location: Messe Berlin

Website: <https://www.innotrans.com/>

■ About J-TREC booth
