Japan Transport Engineering Company

J-TREC to Exhibit at InnoTrans2022

Japan Transport Engineering Company (J-TREC) participates in InnoTrans2022, which is the leading international trade fair for transport technology to be held from September 20 to 23, in Berlin, Germany.

J-TREC develops products integrating the most advanced technologies and has been delivering rolling stock to countries and regions such as in Europe or in Asia. In InnoTrans2022, our products and technologies, mainly environmentally friendly hybrid trains for the next generation, are to be introduced.
