

J-TREC at InnoTrans 2014

J-TREC participated as an exhibitor at InnoTrans 2014, the international trade fair held between September 23 to 26, 2014 in Berlin, Germany. It was our sixth participation at InnoTrans.

For this year's exhibition, J-TREC co-exhibited with JR East for the first time. J-TREC presented a mockup of our Sustina stainless steel railcars and virtual reality experience, in addition to the hybrid train series recently put into our product portfolio and we demonstrated our capability to deliver total rail solution including maintenance as a member of JR East group. JR East showcased Shinkansen driving simulator and Shinkansen models to introduce its state-of-the-art technologies.

We thank all the visitors who came to J-TREC & JR East joint booth for making this exhibition a real success.

We look forward to seeing you again after two years, at InnoTrans 2016!
