Japan Transport Engineering Company (J-TREC)

J-TREC to Exhibit at InnoTrans 2016

Japan Transport Engineering Company (J-TREC) will be participating as an exhibitor at InnoTrans 2016 which will be held from September 20 to 23, 2016 in Berlin, Germany.

Since the world's first diesel hybrid train manufactured in 2007 for commercial operation, J-TREC has been a pioneer in the development and production of hybrid trains. As of August 2016, there have been a total of 31 hybrid cars made by J-TREC in operation by East Japan Railway Company (JR East) and we will be showcasing our line-up of hybrid technology along with other state-of-the-art products.

The outline of the exhibition is as shown below. We look forward to your visit in Berlin.

■ Exhibition: InnoTrans 2016

Date: September 20 to 23, 2016
